

**NO LIMITS FOR
INNOVATION**

ABOUT US

We are one of the fastest-growing and most dynamic Surgical and Medical device Company in India. We have secured a reputed position by the name of "Technomed" brand, as Exporter of surgical consumables. Our range of products spans the entire spectrum of medical applications, from the latest O.T. tools to devices, and ergonomically designed furniture for both clinical and institutional use. Ever since the inception in 2005, our services under the leadership of Managing Director- Rishi Agarwal and Director Rahul Rajan our team has strived tirelessly to accomplish the company's policy to delight its customers by supplying consistent quality of products as per their specified requirements and delivery schedules at most competitive prices. Apart from this, the continual development coupled with a wealth of ideas and total commitment to quality has helped us to gain reputation for excellence as a manufacturer and supplier.

Our company provides a professional and open work environment. Our passion for a better quality of life drives our involvement in our community and gives us pride.

We provide efficient and prompt services through the personnel in Sales, Admin, Logistics, Finance & Support departments.

LATEX EXAMINATION GLOVES

- Crafted from high-quality natural latex, these gloves provide a superior barrier against contaminants and pathogens, ensuring both safety and reliability.
- Ensures hygiene and safety for both practitioners and patients during patient examinations.
- Fits both hands comfortably, offering convenience and versatility for quick and easy application.
- Smooth texture, enhances tactile sensitivity, allowing for precise handling and a secure grip.
- Engineered for durability, offering excellent puncture resistance to remain intact.
- Soft and Flexible design allows for extended wear without causing hand fatigue.
- The beaded cuff design prevents roll-down, ensuring easy donning and removal.
- Non Sterile, ready for use.
- Box of 100 pcs.

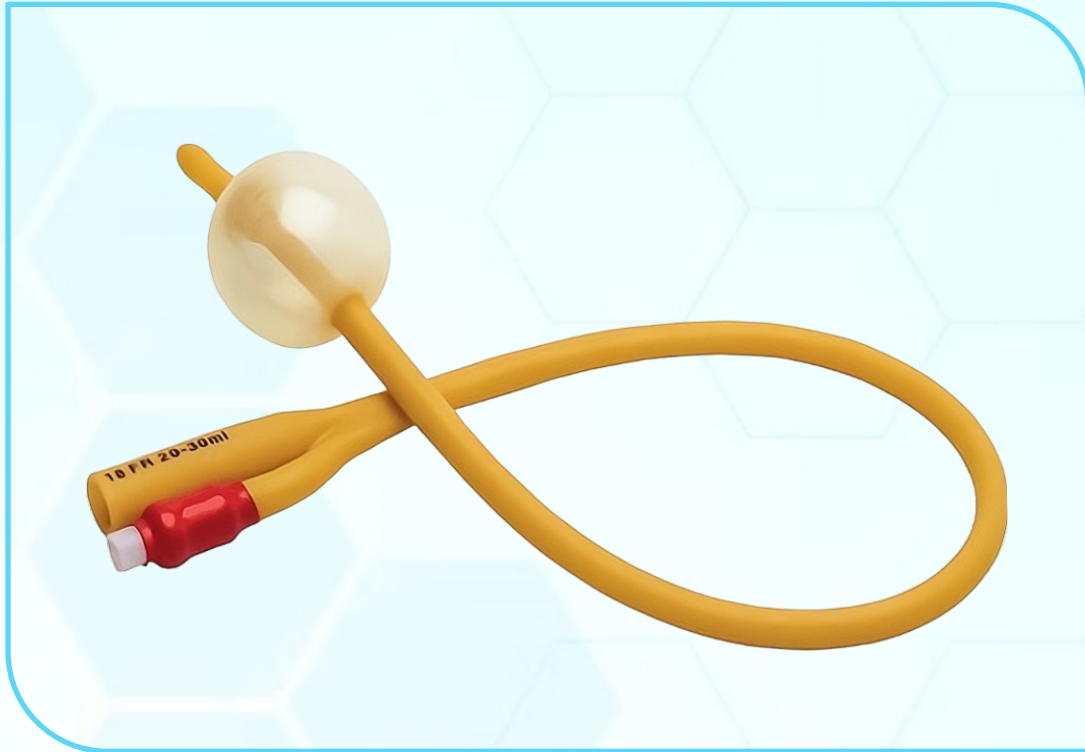

LATEX SURGICAL GLOVES

- Expertly crafted to provide superior protection and tactile sensitivity during surgical procedures.
- High quality natural latex offers superior elasticity, strength, and durability for reliable protection.
- Enhanced tactile sensitivity allows for precise handling of instruments and delicate tissues.
- Designed to conform closely to the hand, ensuring a comfortable and secure fit that reduces hand fatigue.
- Beaded cuff prevents roll-down and provides added strength and ease of donning.
- Suitable for a wide range of medical applications requiring sterile, protective gloves.
- Sterile, ready for use.
- Box of 50 pairs.

FOLEY CATHETER

- Medical-Grade Silicone ensures biocompatibility, minimizing irritation, allergic reactions, and encrustation, while providing long-term durability.
- Ideal for managing urinary retention and post-surgical recovery.
- Features two channels - one for drainage and one for inflation - for optimal urinary management.
- Soft and Flexible design for patient comfort, allowing for easy insertion and reduced discomfort during use.
- Symmetrical Balloon provides a secure fit in the bladder, preventing leakage and ensuring stable placement.
- Radiopaque Line allows for easy X-ray identification, ensuring proper placement and monitoring.
- Non-toxic, sterile, single use.

URINE BAG

- Made from high quality vinyl for durability and flexibility.
- Anti-reflux valve prevents backflow of urine, reducing infection risks.
- Features a secure drainage port for leak-free connection to catheters or tubing systems.
- Ideal for post-operative care to manage and monitor urine output in hospital and home healthcare settings.
- Individually packaged to maintain product sterility until used.
- Non-toxic, sterile, single use.
- Sizes available as per need.

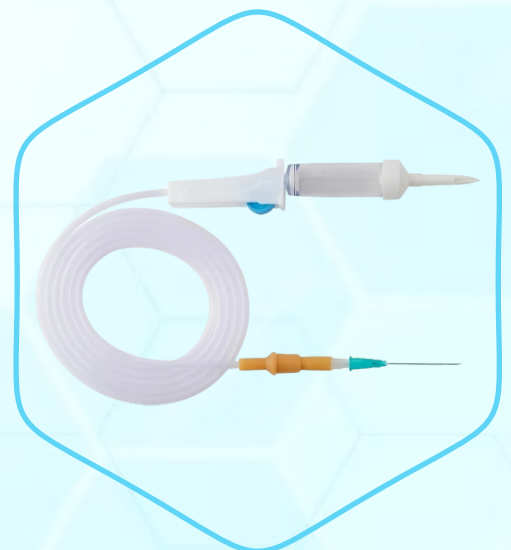

IV CANNULA WITH INJECTION PORT AND WINGS

- Provides secure and efficient venous access for intravenous therapy.
- Sharp needle facilitates smooth and painless insertion.
- Integrated injection port and wings for convenient medication administration and secure fixation.
- Features a secure hub that provides a leak-free connection to IV tubing and accessories.
- Flexible, kink resistant catheter maintains consistent flow and patient comfort.
- Colour coded hubs for quick and accurate size identification.
- Individually packaged to maintain sterility until used.
- Non-toxic, sterile, single use.

IV SET

- Designed to provide reliable intravenous access and a controlled fluid delivery.
- Crafted from high quality PVC to ensure durability and biocompatibility.
- Precision drip chamber allows for accurate monitoring and control of fluid flow rates.
- Secure injection port provides for seamless medication administration.
- Compatible with standard IV catheters, connectors, and accessories for seamless integration.
- Individually packaged to maintain sterility until used.
- Non-toxic, sterile, single use.
